

EXTRA - CURRICULAR ACTIVITIES

2026-2027

Our Extra-curricular activities programme offers a wide variety of options for our pupils to continue learning after school.

Activities are carefully planned to encourage self-improvement, team spirit, fair play, creativity and imagination.

Extra-curricular activities allow pupils to come into contact with children from other classes, to make new friends and to develop new relationships and strengthen the ones they already have in a different and fun context.

RELEVANT INFORMATION

What is the deadline for registering for an extracurricular activity? As places are limited, we suggest that you register as soon as possible using the online form on our website or from the communications you receive through Cognita Connect.

Is it possible to register my child for one month instead of a full term? For organizational reasons, after-school activities are offered on a termly basis. If you wish to register your child after the term has started, we will charge for the rest of the term.

Why does a long term (15 weeks) cost the same as a short term (9 weeks)?

The price is based on an annual calculation which is invoiced in three equal quarterly instalments.

How is payment handled? The invoice for extracurricular activities will be issued quarterly (October, January and April), at the beginning of each term, according to the conditions agreed with the school. Taking into account that we have not included the month of September in the price because that is when the students try the activities.

What is the price per term for extra-curricular activities?

The price is 169€ termly.

Tiny Architects activity, Modern Dance and Acrobatics 195€/termly

Lamda 30€/session

Lamda Public Speaking 60€/month

Coding Club & Robotics 195€/termly

3D & Virtual Reality Club 195€/termly

Didact Music (Instrument 81€/month, Instrument + Musical language 102€/month)

What is the price for sports with two sessions a week "e.g. Basketball/Volleyball"? The price per term will be 300€ termly for two sessions + Matches & 225€ termly for one session a week + Matches. Students on the competitive teams will have to purchase the corresponding equipment.

Is there a cancellation policy? For organizational reasons, refunds are not possible except for justified medical reasons. However, if your child wishes to change activities within the same term, this will be possible, provided there is a place available.

Are all extra - curricular activities in English? All extracurricular activities are taught in English. As we offer activities that are taught by other organisations, on some occasions, in situations of teacher substitution due to medical or personal reasons, it is possible that the teachers may not have a high level of English.

Do all extracurricular activities take place inside the buildings? Most of the activities in our programme take place inside the corresponding building, but some sports activities take place in the sports facilities we have, Bendicion de Campos and Azulinas use Colegio Mayor and Lorenzo Solano Tendero and Manuel Marañon 8 uses the sports courts.

Do students have to bring any specific equipment or material? For sports activities, pupils should bring the school's Physical Education equipment. For the rest of the activities, the school will provide students with the necessary equipment.

Do we federate students (Little Dragons or MMA)? For those clubs in which we can federate students, families will have the option, paying the corresponding fee.

What is the daily procedure? At the end of the school day, the class teacher will accompany the pupils to the classroom/space where monitors/teachers of the extracurricular activities will take them to their activity.

What are the opening hours for after-school activities? As a general rule, after-school activities take place between 16:15 and 17:15 (Paseo de la Habana, Bendicion de Campos, Azulinas and Sobradriel) and between 16:30 and 17:30 (Lorenzo Solano Tendero and Manuel Marañon 8). Check the timetable for each activity in the table.

Where will we pick up our children at the end of the activities? Parents/guardians must pick up their children at 17.15 at the latest (Paseo de la Habana, Bendición de Campos, Azulinas and Sobradriel) and at 17:30 (Lorenzo Solano Tendero and Manuel Marañon 8) at the entrance of the corresponding building.

What is the latest time to pick up my child? The school closes from Monday to Friday at 17.30. The time to collect the students for early years and primary will be at 17:15 and for secondary at 17:30.

Will there be activities in secondary school at midday? Yes, these activities will be free of charge for those students who have contracted the canteen service and as they depend on the timetables of our teachers, we will send more information in September.

CONDITIONS

- The school guarantees the quality of all activities provided by internal/external collaborators.
- For organisational reasons, extra-curricular activities are offered on a termly basis.
- The price is based on an annual calculation which is invoiced in three equal quarterly installments.
- The invoice for extracurricular activities will be issued quarterly, at the beginning of each term, in accordance with the conditions agreed with the school.
- Discount 20% from the third sibling doing ECAs in the school and from the third ECA onwards.
- For organisational reasons, refunds are not possible. However, if your child wishes to change activity within the same term, this will be possible, provided there is a place available.
- To go ahead with an activity, there must be a minimum of 8/10 students enrolled.

HASTINGS SPORTS CLUBS

Extra-curricular Activities 2026-2027

HASTINGS SPORTS CLUBS

EXTRA-CURRICULAR ACTIVITIES 2026-2027

LITTLE DRAGONS BRAZILIAN JIU-JITSU

Fully based on Brazilian Jiu-Jitsu. The aim is to help children develop confidence, determination and discipline when facing challenges, while introducing them to the world of martial arts in a fun and alternative way—different from more traditional disciplines. Instead, sessions include psychomotor games designed to support the development of physical, mental, and athletic skills.

José Canto instructor and CEO of Canto Martial Arts, with over 15 years of experience working with both children and adults in the field of martial arts and self-defence. A Madrid MMA Champion and competitive athlete in the field of Mixed Martial Arts (MMA), he is also an official trainer for Spanish law enforcement and security forces. José currently serves as the Technical Director of the Jeet Kune Do department within the Madrid Wrestling Federation.

169€/Termly

MMA Youth(Mixed Martial Arts + Self Defense)

This activity combines two disciplines: MMA (Mixed Martial Arts) and Brazilian Jiu-Jitsu. Focused purely on sport, its main aim is to teach teenagers important values such as discipline, perseverance, and effort.

Physically demanding and offering opportunities for competition, the programme is both fun and motivating for students preparing to eventually transition into the adult programme. Boxing, Kickboxing, Grappling, and more are included in this exciting fusion of martial arts, which continues to grow in popularity every day.

Canto Martial Arts

Since 2015, Canto Martial Arts has been shaping fighters—both on and off the mat. Over the past 10 years, more than 3,000 students have taken part in our training programmes. Today, we're proud to have a thriving community of over 300 active students, half of whom are children and teenagers. Our commitment goes beyond technique. We create a welcoming, family-like environment where every student develops not only their martial arts skills, but also their personal and interpersonal growth. At Canto Martial Arts, we strive for mastery, continuous growth, and building a true sense of family through the discipline of martial arts.

VOLLEYBALL

This activity allows students to learn and practice the sport of volleyball, developing coordination, agility and team spirit. They will work on the basic techniques of serving, receiving and passing. It will encourage companionship and respect for the rules of the game. The activity will be adapted to the level of each participant, promoting active participation and skill development.

Term 1

- Know the basic rules and positions of volleyball.
- Practice basic serves and receptions.
- Encourage teamwork and respect.

Term 2

- Improve passing and setting techniques.
- Learn simple spikes and blocks

Term 3

- Integrate all skills into collective play.
- Playing friendly games and matches

169€/Termly

RUNNING CLUB

In this activity, students will develop their physical endurance and learn healthy habits through running. They will work on running technique, breathing and personal motivation. Teamwork and self-improvement will be encouraged through challenges and group dynamics. In addition, basic notions of warm-up and stretching will be integrated.

Term 1

- Learn basic running safety rules.
- Learn warm-up and stretching techniques.
- Develop aerobic endurance with progressive sessions.

Term 2

- Improve running technique and breathing.
- Participate in individual and group challenges
- Encourage motivation and self-improvement.

Term 3

- Prepare a final event (sprint or circuit).
- Integrating all skills into a training routine

HASTINGS SPORTS CLUBS

EXTRA-CURRICULAR ACTIVITIES 2026-2027

MULTI SPORT

A multisports activity is an extracurricular program that introduces participants to a variety of sports and physical games. It promotes overall physical development, teamwork, and coordination by engaging in different athletic disciplines. Children or students rotate through sports like soccer, basketball, athletics, and more, gaining exposure to diverse skills. This variety keeps the activity fun and engaging while encouraging a healthy, active lifestyle. It's ideal for building confidence and discovering new interests in a supportive environment.

Term 1

- Explore different sports and develop basic motor skills.
- Build confidence, teamwork, and understanding of game rules.

Term 2

- Improve sport-specific techniques and coordination.
- Encourage cooperation, strategy, and personal progress.

Term 3

- Apply skills in games and mini-tournaments.
- Promote leadership, enjoyment, and healthy habits.

169€/Termly

TABLE TENNIS

In this activity, students will discover the basic techniques of table tennis, developing coordination, agility and reflexes. They will learn the rules of the game, the types of strokes and the placement of the ball. Respect, concentration and sportsmanship will be encouraged. The activity will be adapted to all levels and mini-tournaments will be held to put what has been learnt into practice.

Term 1

- Learn the basic rules and how to handle the paddle.
- To learn basic strokes (drive, backhand, serve).
- Encourage concentration and sportsmanship.

Term 2

- Improve accuracy in strokes and movements.
- Practise playing in pairs and doubles

Term 3

- Refine serving and spin techniques.
- Play internal tournaments

169€/Termly

FOOTBALL

In this activity, students will develop their football skills, learning the basic rules and essential techniques such as passing, control and shooting. Teamwork, respect and sportsmanship will be encouraged. Through training and friendly matches, participants will improve their physical condition and their ability to cooperate. In addition, they will work on developing strategies and decision making during the game.

Term 1

- Know the basic rules and positions of the game.
- Improving ball control and passing
- Encourage respect and teamwork

Term 2

- Work on shooting and dribbling techniques.
- Learn basic strategies for collective play
- Participate in friendly matches and team dynamics

Term 3

- Develop tactics and organisation on the pitch.
- Encouraging autonomy and decision-making in the game
- Prepare a tournament or final match between teams.

169€/Termly

HASTINGS SPORTS CLUBS

EXTRA-CURRICULAR ACTIVITIES 2026-2027

FENCING

Fencing is an extracurricular activity aimed at introducing pupils to this sport in a fun and safe way. Through games, exercises and training adapted to their age, they will learn the basics of foil handling, posture and movement. Fencing encourages concentration, coordination, discipline and respect for others, while also developing physical agility and quick thinking in an enjoyable and motivating environment.

The activity aims to:

- Improve coordination, agility and balance
- Develop concentration and reaction speed
- Promote discipline, respect and safety
- Build confidence, self-esteem and cooperation.

Term 1:

Introduction to fencing, including basic posture, weapon grip, footwork and reaction-based games.

Term 2:

Development of footwork, defensive actions (parries), attacks and counter-attacks through structured and playful activities.

Term3:

Consolidation of techniques through controlled bouts and friendly competitions, promoting confidence and application of skills learned

169€/Termly

BALLET

This activity invites students to enter the world of classical dance, learning the basic positions, technique and body expression. Coordination, flexibility and discipline will be worked on. Musicality and elegance in movement will be encouraged. The level of demand will be adapted to each participant, promoting enjoyment and learning through constant practice.

Term 1

- Knowing the basic positions and body posture.
- Working on coordination and balance
- Develop musicality and artistic expression.

Term 2

- Improve barre and centre techniques.
- Integrate small displacements and dance steps
- Encouraging discipline and perseverance

Term 3

- Prepare a final group choreography.
- To perfect all the techniques worked on during the course.

169€/Termly

MODERN DANCE

This activity is delivered in collaboration with Rosa Llauredó from **DanceesCool**, a dance school with more than 10 years of experience and over 1,500 students.

Jazz is a dance discipline that incorporates elements and movements from ballet, disco, breakdance, funky, hip-hop, blues, rap, twist, swing and rock & roll. Commercial dance, on the other hand, is a style that has developed through the adaptation of urban culture within the pop music industry.

At the end of the course, a Festival will be organised — a unique opportunity for pupils to take part in a large-scale performance for family and friends. This will take place in one of the city's theatres that host major musicals, providing a professional experience with stage sets, lighting, sound and a central theme.

The activity aims to:

- Develop body awareness, coordination and confidence
- Encourage creativity, musicality and self-expression
- Improve flexibility, strength and performance skills
- Promote teamwork and collaboration

Term 1:

Learn basic modern dance techniques and develop body awareness. Explore rhythm, space and expressive movement, while building confidence and creativity through improvisation.

Term 2:

Develop choreography skills and refine technique. Improve coordination, flexibility and musicality, while encouraging group collaboration and expressive storytelling.

Term 3:

Prepare and perform choreographed routines for the final show. Strengthen stage presence and performance confidence and reflect on personal growth and artistic expression.

195€/Termly

HASTINGS SPORTS CLUBS

EXTRA-CURRICULAR ACTIVITIES 2026-2027

ACROBATICS

Acrobatics is a dynamic extracurricular activity that combines strength, flexibility, balance, and coordination through controlled body movements. Students learn skills such as rolls, handstands, cartwheels, and partner balances in a safe and supportive environment. The activity promotes physical fitness, body awareness, and self-confidence. Teamwork and trust are also developed through group routines and cooperative exercises. It's a fun and energetic way for students to challenge themselves and express creativity through movement.

Term 1

- Develop basic acrobatic skills such as rolls, balances, and flexibility.
- Build strength, coordination, and body control through foundational exercises.
- Promote safety awareness and proper technique.

Term 2

- Learn more complex movements like handstands, cartwheels, and partner work.
- Improve balance, timing, and spatial awareness.
- Encourage teamwork and trust through group activities.

Term 3

- Combine learned skills into short routines or sequences.
- Focus on performance quality, creativity, and confidence.
- Reflect on progress and celebrate achievements in a final showcase.

195€/Termly

BADMINTON

Badminton is a racket sport in which players hit a shuttlecock over a net, aiming to land it in the opponent's court without it touching the ground on their own side. In this extracurricular activity, pupils learn the basic rules, serving techniques, striking skills, movement and game strategies. In addition to improving physical fitness, speed, coordination and agility, the activity promotes concentration, respect for rules and teamwork through matches and cooperative exercises.

The activity aims to:

- Improve coordination, agility, speed and endurance
- Develop precision and control in strokes and movement
- Promote discipline, concentration, strategy and fair play

Term 1:

Introduction to badminton, including basic techniques and familiarisation games.

Term2 :

Development of strokes, movement and game strategy through structured practice.

Term 3:

Friendly competitions and consolidation of skills learned throughout the course.

169€/Termly

YOGA

Yoga is an activity that combines movement, breathing and relaxation to support pupils' physical and emotional wellbeing. Through games, age-appropriate postures, breathing exercises and mindfulness activities, participants develop flexibility, coordination, balance and body awareness. In addition, yoga helps to improve concentration, emotional regulation and self-confidence, providing useful tools for everyday life. The activity takes place in a calm and respectful environment, promoting healthy habits and overall wellbeing.

Term 1:

Learn basic yoga postures and breathing techniques adapted to the age of the participants. Develop body awareness, coordination and balance through playful activities and relaxation exercises.

Term 2:

Further develop movement sequences and breathing exercises. Enhance concentration, emotional management and the ability to relax through a range of mindfulness and wellbeing activities.

Term 3:

Integrate the skills acquired through more complete sessions that combine movement, breathing and relaxation. Encourage independence in practice, reflect on the benefits gained, and share learning and experiences from throughout the course.

169€/Termly

HASTINGS ARTISTIC CLUBS

Extra-curricular Activities 2026-2027

HASTINGS ARTISTIC CLUBS

EXTRA-CURRICULAR ACTIVITIES 2026-2027

DRAMA

This activity offers students a space to explore artistic expression through theatre. They will work on improvisation, acting and character creation. Confidence, oral and corporal expression, and teamwork will be developed. In addition, empathy and creativity will be encouraged, allowing each participant to find their voice on stage.

Term 1

Learn basic techniques of body and vocal expression.
Explore improvisation and interpretation of emotions.
Build confidence and respect in the group.

Term 2

Develop simple scenes and characters.
Work on voice projection and diction
Participate in theatre games and group dynamics.

Term 3

Rehearse a small group play or sketch grouping together everything learnt in the course.
Present the final project before an audience.

169€/Termly

CHESS

Chess is a strategic board game that challenges students to think critically, plan ahead, and solve problems. In this extracurricular activity, students learn the rules, tactics, and strategies of the game in a fun and engaging way. It helps improve concentration, memory, and decision-making skills. Through friendly matches and puzzles, students develop patience, sportsmanship, and logical thinking. Chess is a great way to stimulate the mind while enjoying healthy competition.

Term 1

- Learn the basic rules, piece movements, and board setup.
- Understand simple tactics like check, checkmate, and basic openings.
- Develop focus, patience, and good sportsmanship.

Term 2

- Explore intermediate strategies such as forks, pins, and castling.
- Practice planning ahead and evaluating positions.
- Encourage friendly competition through guided games and puzzles.

Term 3

- Apply strategies in full games and mini-tournaments.
- Analyze games to improve decision-making and critical thinking.
- Reflect on progress and celebrate achievements in a final chess event.

169€/Termly

POTTERY

Pottery is an artistic and manual activity that allows students to model clay and other materials with their own hands to create unique and expressive pieces. Through basic techniques such as modelling, kneading and building with plates, participants develop fine motor skills, patience and attention to detail. This activity encourages concentration, spatial perception and three-dimensional creativity, while bringing students closer to an ancient art form with cultural and functional value.

Term 1

- Getting to know materials and rules for the use of the workshop. Learn basic modelling techniques (balls, cylinders, plates).

Term 2

- Working on detail: textures, incisions, decorative forms.

Term 3

- To make a free piece combining the techniques learnt.

169€/Termly

HASTINGS ARTISTIC CLUBS

EXTRA-CURRICULAR ACTIVITIES 2026-2027

ART CLUB

Art Club is a creative space where students explore different artistic techniques and materials, such as drawing, painting, collage, and sculpture. It encourages self-expression, imagination, and experimentation in a relaxed and supportive environment. Students develop fine motor skills, visual thinking, and an appreciation for art. The club also promotes collaboration through group projects and themed activities. It's a fun and inspiring way to nurture creativity and artistic confidence.

Term 1

- Explore basic art techniques such as drawing, painting, and collage.
- Encourage creativity, self-expression, and experimentation with materials.
- Develop fine motor skills and confidence in artistic abilities.

Term 2

- Introduce new mediums like sculpture, mixed media, or printmaking.
- Learn about famous artists and art styles for inspiration.
- Promote collaboration through group projects and themed challenges.

Term 3

- Create personal or group art pieces for display or exhibition.
- Reflect on artistic growth and creative choices.
- Celebrate achievements and share artwork with the school community.

169€/Termly

ART & CRAFTS

Art & Crafts is an activity focused on developing students' imagination and expressive capacity through art. Here, students will learn to represent ideas, emotions and concepts through drawing, using different techniques and materials. Free creation, visual exploration and the discovery of their own artistic style are encouraged. In addition, they work on aspects such as observation, concentration and aesthetic appreciation, fostering confidence in their expressive abilities.

Term 1

- To explore lines, shapes and colours with creative freedom. To learn basic techniques.

Term 2

- Represent objects, landscapes or characters in detail, in different styles and techniques such as comic, manga or realism.

Term 3

- To produce a personal work applying what has been learnt.

169€/Termly

MINI CHEF

In this activity, students will approach the world of cooking in a fun and safe way. They will learn simple and healthy recipes, discovering ingredients and basic cooking techniques. Autonomy, creativity and responsibility are encouraged. They will also work on the importance of hygiene and safety in the kitchen. The activity will encourage teamwork and the development of healthy eating habits.

Term 1

- Knowing kitchen utensils and safety rules.
- Preparing simple, cold recipes.
- Learning to measure and organise ingredients.

Term 2

- Cook recipes that require heat (microwave and/or air fryer).
- Explore flavours and textures in food.
- Develop creativity with fun presentations.

Term 3

- Create complete menus to share.
- Appreciate the importance of healthy eating

HASTINGS ARTISTIC CLUBS

EXTRA-CURRICULAR ACTIVITIES 2026-2027

CREATIVE SEWING

Creative Sewing is an activity that introduces pupils to the world of design and textile creation in a practical and enjoyable way. Through a range of sewing techniques, personalisation and project work, they will develop creativity, patience and fine motor skills. Pupils will learn to work with different materials and tools adapted to their age, turning their ideas into unique creations. The activity also promotes independence, concentration and the satisfaction of creating objects with their own hands.

Term 1:

Learn about basic sewing materials and tools. Practise simple stitching techniques and complete small creative projects adapted to pupils' level.

Term 2:

Experiment with new textile decoration and personalisation techniques. Develop more detailed projects, encouraging creativity, precision and independence.

Term 3:

Design and create a personal piece or collection applying the skills acquired. Prepare a final exhibition to share their creations with families and the school community.

169€/Termly

KIVER LOGIC

Kiver Logic is an activity designed to develop logical thinking, creativity and problem-solving skills through challenges adapted to each age group. Pupils will take part in brain games, riddles, mathematical challenges and cooperative activities that will test their reasoning in a fun and motivating way. They will learn to analyse situations, seek solutions and work as part of a team. Who knows? By the end of the course, they may even be able to design their own challenges, puzzles or even an Escape Room.

Term 1:

Develop basic skills in logic, observation and reasoning through brain games, riddles and individual challenges. Focus on attention, memory and solving simple problems.

Term 2:

Introduce more complex challenges requiring planning, strategic thinking and teamwork. Carry out activities involving construction, spatial awareness and cooperative problem-solving.

Term 3:

Design and create their own challenges, trial circuits or small Escape Rooms. Apply the knowledge acquired and share their creations, celebrating the achievements made throughout the course.

169€/Termly

KIVER PODCAST

Kiver Podcast is an innovative activity in which pupils will become true communicators. They will learn how to create and manage a podcast channel, developing content on current affairs, culture, science, sport and topics of interest to the pupils themselves. Throughout the course, they will work on oral expression, active listening, creativity and critical thinking by producing interviews, reports and themed programmes. In addition, they will discover how to communicate information, ideas and experiences in a clear and engaging way, strengthening their confidence in public speaking and their ability to work as part of a team.

Term 1:

Explore the world of podcasting and different communication formats. Develop oral expression, expressive reading and the creation of short scripts, news items and content relevant to pupils' interests.

Term 2:

Design more developed programmes and carry out interviews on a variety of topics. Build skills in research, organisation, active listening and teamwork, learning how to prepare and present content in an engaging way.

Term 3:

Create and record podcast episodes on topics chosen by the pupils, reflecting on the learning process, communication skills and collaboration developed throughout the course.

HASTINGS ARTISTIC CLUBS

EXTRA-CURRICULAR ACTIVITIES 2026-2027

SCIENCE CLUB

The Sciences activity is a hands-on, curiosity-driven program where students explore topics in biology, chemistry, physics, and environmental science. Through experiments, projects, and interactive challenges, they learn to observe, question, and investigate the world around them. The activity encourages critical thinking, teamwork, and a love for discovery. Students develop scientific skills such as forming hypotheses, conducting experiments, and analyzing results. It's a fun and engaging way to bring science to life beyond the classroom.

Term 1

- Introduce the scientific method: observation, hypothesis, experimentation, and conclusion.
- Explore basic concepts in biology, chemistry, and physics through simple experiments.
- Encourage curiosity, questioning, and safe lab practices.

Term 2

- Conduct hands-on projects related to everyday science (e.g., ecosystems, states of matter, forces).
- Develop skills in recording data, analyzing results, and presenting findings.
- Promote teamwork and collaborative problem-solving.

Term 3

- Apply knowledge in creative experiments or science fair-style projects.
- Reflect on scientific discoveries and their impact on daily life.
- Celebrate learning through presentations or a mini science exhibition.

TINY ARQUITECTS

Tiny architects aims to introduce architecture to environmental values, and to show the great capacity of this discipline to reduce the impact on our planet through the design of cities and buildings that are more responsible and in balance with our environment. Draw by architects, build and learn playing games.

Objectives:

Learn about unique buildings and architects and their creative design processes, draw plans, discover new typologies, experiment with new materials, and build 3D models as architects!

Acquire more knowledge about our environment to be more aware of our impact on building more sustainable cities. Draw, build and learn by playing through fun and creative workshops led by Paula Ábalos, architect.

HASTINGS STEAM CLUBS

Extra-curricular Activities 2026-2027

HASTINGS ARTISTIC CLUBS

EXTRA-CURRICULAR ACTIVITIES 2026-2027

ROBOTICS

In this activity, participants form part of a team that will have to solve a wide variety of technological challenges by putting their creativity into play. As they progress in their missions, they will incorporate new knowledge and skills, combining the mechanisation of robots, the construction of maker elements tailored to their narratives or discovering the fastest route to get around by programming their prototypes. Whether in outer space, sailing with pirates or designing a smart city with autonomous vehicles, each team will have to devise their own solutions and strategies to achieve their goals. They will progressively improve the technical level of their prototypes, with more precise control of their speed and orientation, incorporating various sensors to orient themselves.

Learning objectives

- Design and prototyping methodology
- Computational thinking
- Understanding and application of Artificial Intelligence

Key skills

- Lateral thinking (creativity)
- Logical-mathematical competence
- Strategic thinking

195€/Termly

3D & VIRTUAL REALITY CLUB

Immersive activity where students combine 3D design, virtual worlds and interactive stories. Students begin by modelling volumetric figures in Tinkercad, learning principles of construction and spatial orientation to create digital prototypes. Progressively, they learn to integrate these models into virtual reality scenes with Delightex, a creation space where they can incorporate animations and special effects through programming; creating interactive stories and augmented reality elements.

Learning objectives

- Design methodology
- 3D modelling and prototyping
- Programming of interactive elements

Key skills

- Lateral thinking (creativity)
- Logical-mathematical competence
- Visual-spatial orientation

195€/Termly

CODING CLUB

In this programming extracurricular, students develop computational thinking by designing and coding their own video games and digital worlds. The projects are adapted to the level of each class, increasing in complexity as they progress. They begin by creating games with MakeCode Arcade and progress to three-dimensional environments and more advanced programming in Minecraft Education. Throughout the course, they expand their programming vocabulary and become familiar with Artificial Intelligence concepts, applying them to creative and motivating projects.

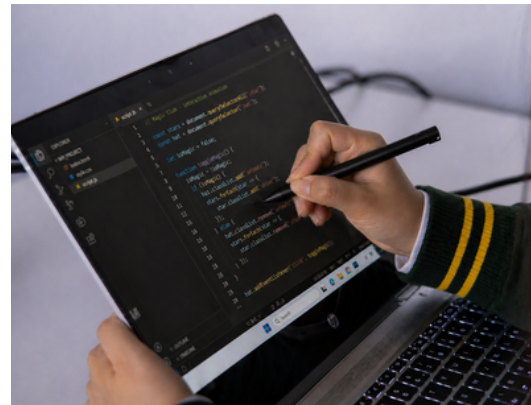

Learning objectives

- Progressive development of computational thinking adapted to each level.
- Increasing mastery of programming structures and debugging of code.
- Introduction and practical application of Artificial Intelligence in advanced courses.

Key skills

- Lateral thinking and creative problem solving.
- Logical-mathematical competency for analysis and coding.
- Abstract and analytical thinking for complex projects.
- Visuospatial orientation, especially in 3D environments and world design.

HASTINGS LANGUAGE CLUBS

Extra-curricular Activities 2026-2027

HASTINGS LANGUAGE CLUBS

EXTRA-CURRICULAR ACTIVITIES 2026-2027

FRENCH CLUB

This activity invites students to immerse themselves in French language and culture through games, songs, stories and creative activities. Oral communication and cultural understanding will be encouraged. They will work on basic vocabulary, everyday expressions and explore aspects of French gastronomy, music and traditions. The activity has a playful and dynamic approach, adapted to different levels.

Term 1

- Learn basic greetings and introductions in French
- Learning everyday vocabulary and numbers
- Introducing traditional songs and games

Term 2

- Improve listening comprehension and pronunciation
- Participate in simple dialogues and role plays
- Explore French festivals and traditions

Term 3

- Expand vocabulary and expressions in different contexts
- Encourage oral expression in everyday situations

169€/Termly

GERMAN CLUB

In this activity, students will discover the German language and culture through interactive and playful activities. They will learn basic vocabulary, everyday expressions and popular songs. Traditions and customs from German-speaking countries will be explored. Active participation and dynamic learning will be encouraged, adapted to each student's level.

Term 1

- Getting to know basic greetings and phrases in German
- Learning numbers and colours
- Introducing popular songs and games

Term 2

- Expand vocabulary and everyday expressions
- Participate in dialogues and role plays
- Explore cultural aspects

Term 3

- Extend vocabulary and expressions in different contexts
- Encourage oral expression in everyday situations

169€/Termly

CHINESE CLUB

This activity introduces students to the fascinating world of Chinese language and culture. They will work on basic vocabulary, simple characters and greetings, as well as exploring traditional festivals, music and art. Curiosity, cultural openness and active participation will be encouraged. The activity is playful and dynamic, adapted to different levels and ages.

Term 1

- Getting to know basic greetings and introductions in Chinese
- Learning simple characters and their meaning
- Explore folk songs and stories

Term 2

- Improve pronunciation and tone recognition
- Participate in simple dialogues
- Discover festivals, songs and folktales
- Discover the meaning and meaning of Chinese songs and tales
- Discover Chinese festivals and traditions

Term 3

- Expand vocabulary and expressions in different contexts
- Encourage oral expression in everyday situations

HASTINGS MUSICAL CLUBS

Extra-curricular Activities 2026-2027

HASTINGS MUSICAL CLUBS

EXTRA-CURRICULAR ACTIVITIES 2026-2027

MUSIC AND MOVEMENT

Music & Movement is a playful and creative activity that combines rhythm, dance, and musical expression. Children explore sounds, songs, and body movements to develop coordination, listening skills, and a sense of rhythm. The activity encourages imagination, self-expression, and social interaction through group games and musical storytelling. It supports physical development and emotional expression in a joyful environment. Music & Movement is ideal for young learners to connect with music while staying active and having fun.

Term 1:

- Explore basic rhythms, beats, and body movements.
- Develop listening skills and coordination through simple songs and actions.
- Encourage creative expression and participation in group activities.

Term 2:

- Introduce musical patterns, tempo changes, and movement sequences.
- Improve motor skills and spatial awareness through dance and games.
- Foster confidence and imagination through musical storytelling.

Term 3:

- Combine music and movement into short performances or routines
- Strengthen memory, timing, and expressive movement.
- Celebrate creativity and progress in a joyful group setting.

169€/Termly

ROCK BAND

Rock Band is a collaborative music activity where students learn to play instruments like guitar, bass, drums, as part of a group. It focuses on developing musical skills, rhythm, and teamwork through rehearsing and performing popular rock and contemporary songs. Students gain experience in listening, timing, and stage presence while building confidence. The activity encourages creativity, cooperation, and a passion for music. It's a fun and energetic way to experience the excitement of making music together.

Term 1

- Learn the basics of each instrument (bass, drums).
- Understand rhythm, tempo, and how to play in sync as a group.
- Build confidence through simple song practice and group rehearsals.

Term 2

- Improve technique and timing on individual instruments.
- Explore song structure, dynamics, and basic improvisation.
- Strengthen collaboration and communication within the band.

Term 3

- Prepare and perform full songs as a band.
- Focus on stage presence, expression, and live performance skills.
- Reflect on progress and celebrate achievements in a final concert or showcase.

169€/Termly

INDIVIDUAL INSTRUMENTS - DIDACT MUSIC SCHOOL

The most recent neurological studies confirm the great advantages of the study of music for the development of children and adolescents.

Among others: It increases the attention span and language development, strengthens the brain connections of learning in general and the coordination of movements, develops an auditory and visual sensitivity towards art, enhances creative processes and generates positive moods.

The learning programme covers all student profiles, children, adolescents and adults, and is developed with sufficient flexibility to meet the highest quality and level requirements, as well as to serve as an introduction to the basic techniques of the artistic disciplines.

Instrument and musical language: Its main objective is the acquisition of the fundamentals of musical language and the enjoyment of musical expression through the voice and the various musical instruments. This programme is aimed at students from 5 years of age, with or without previous musical knowledge, who wish to begin a complete musical education.

Musical language: Learning the signs and terms that are the basis of musical communication. The aim is to be able to master, by means of the different teaching resources, the terminology and techniques that make it possible to read musical scores, opening up the possibilities of being able to introduce oneself to the musical codes of rhythm, melody and harmony with ease. The education of the ear and rhythm are worked on in depth and in an integrated way with the language of music. Through this learning process, the student will be able to access the interpretation of musical works both vocally and instrumentally, depending on the level studied.

Instrument: Once the student has chosen the instrument through which he/she wishes to express him/herself and communicate musically, the learning of the chosen instrument provides the techniques of interpretation. Under the guidance and accompaniment of the specialist teacher, he/she will help the student to discover his/her potential and expressive possibilities, as well as to overcome any learning difficulties that may arise. The objective is to acquire the highest possible interpretative and expressive level according to the profile of each student. The student can choose to specialise in any of the following instruments:

Instruments- Drums, Clarinet, Double Bass, Flute, Spanish Guitar, Electric Guitar, Electric Bass, Piano, Saxophone, Trombone, Trumpet, Violin / Viola, Violoncello, Singing. Agrupacion or Combo - This course is open to all students who are interested in 'playing in a group', provided that they can demonstrate a minimum level of instrumental competence. Price includes Instrument 81€/month, Instrument + Musical language 102€/month

81€ - 102€/Monthly
